Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-10, drawn to a method for authenticating an originating account for access control, classified in class 713, subclass 155.

II. Claims 11-21, drawn to a method for authenticating and gaining access through proxy logging on, classified in class 713, subclass 201.

2. The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as providing access control without the use of a proxy logon as in invention I. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above, would require a different search and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Conclusion

A shortened statutory period for response to this action is set to expire **one month** (not less than 30 days) from the mail date of this letter. Failure to respond within the period for response will result in ABANDONMENT of the application (see 35 U.S.C. 133, M.P.E.P. 710.02, 710.02(b)).
